

## WHO WE BE

It's like life keeps on going even though it just stopped  
For the faithful, my friends, and black men on the block  
shot at by the cops, hands up, they never dropped, it never stops  
we ain't gonna solve this through hip-hop  
just bring attention, mention it, hoping in the end the tension get  
lighter, that the light gets brighter, that we learn to be fighters  
for rights as well as what is right  
but still lovers of one another  
cause who here's not my brother? On Earth, but one mother  
so why smother each other? Gotta let a brother breathe  
we can do better than deceiving, bereaving,  
leaving others grieving  
Let's start believing in society's patches working together ...  
to start weaving something, achieving something,  
giving to the greater good, receiving something

You ever wondered what type of legacy we'd leave ?  
Or thought about how much greatness we've achieved ?  
Even with faith how can anyone believe  
in you and in me and in who we be?  
You ever wondered what type of legacy we'd leave ?  
Or thought about how much greatness we've achieved ?  
Even with faith how can anyone believe  
That God still believe in us ?

What the hell we doing fighting this war for?  
Budget deficit, but keep paying for more  
We're getting screwed, still sore from the night before  
told more lies than before Nixon resigned or  
feeling fine, see no problems, we're blind  
until we follow our whole soul instead of our minds
